LE XUAN NGOC

Java Developer

I aspire to develop my career as a Java Developer at IT companies focusing on the Japanese market. With a solid foundation in Java programming, Spring Boot, and databases, I am always eager to learn new technologies and adapt to the rigorous, high-quality working processes typical of Japanese companies, such as Agile and strict quality management. My goal is to become a professional software developer. With my existing Japanese language skills, which I continue to improve daily, I aim to be capable of working directly with Japanese clients within the next 2–3 years, ultimately progressing toward a Bridge System Engineer (BrSE) role.

EDUCATION

CODEGYM VIETNAM

JAVA BACKEND

(07/2024 - 06/2025)

01/2025

JLPT N3

INTERESTS

Sport
Karaoke
Learn foreign languages

ADDITIONAL INFORMATION

- **Project: Technology Shop Management**
- **Description:** Studied database concepts and database management systems (MySQL), as well as front-end and back-end technologies including Bootstrap, JSP, Servlet, JDBC, and JSTL.
- **Technologies:** MySQL, Bootstrap, JSP, Servlet, JDBC, JSTL
- **Duration:** 2 months
- **Team size**: 5
- **Link GitHub:** https://github.com/codegym-case-study-module-3/case_study
- ------
- **Project: Pharmacy Management**
- **Description**: Gained knowledge in Spring Framework, ORM, JPA, Hibernate, Thymeleaf, Spring Boot, Ajax, and jQuery. The final team project of the module was a pharmacy management system, successfully integrating Spring Boot into the project.
- **Role:** Developer
- **Technologies:** Spring Boot
- **Duration:** 2 months
- **Team size:** 6
- **Link GitHub:** https://github.com/codegym-module4/casestudy_module4

- ------
- **Project: Airline Ticket Management**
- **Description:** Participated in a team project to develop an airline ticket booking website. Users can book flights and access services after logging into their accounts. The admin panel allows for employee management, customer management, news management, ticket printing, etc. In this module, I had the opportunity to explore and apply new technologies not previously studied, such as Chart.js, Firebase, VNPay integration, and WebSocket.
- **Role:** Developer
- **Technologies:** Spring Boot, Chart.js, Firebase, VNPay, WebSocket
- **Duration:** 2 months
- **Team size**: 6
- **Link GitHub:** https://github.com/codegym-module4/airline_tickets
